Other Findings

Finding

What was found: No result sentence was stored for this check.

Why it matters: Ensures the browser only connects over HTTPS

Evidence:
Ensures the browser only connects over HTTPS

Severity: HIGH | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Missing default-src weakens baseline fallback behavior.

Evidence:
Missing default-src weakens baseline fallback behavior.

Severity: HIGH | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Homepage version-confirmed components: 9; comprehensive version-confirmed components: 10.

Evidence:
Homepage version-confirmed components: 9; comprehensive version-confirmed components: 10.

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Observed xmlrpc.php status 405.

Evidence:

Other Findings (continued)

Observed xmlrpc.php status 405. Restrict or disable xmlrpc unless a business-critical workflow still requires it.

Severity: MEDIUM | Confidence: MEDIUM

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: The wp-json response referenced user endpoints.

Evidence:

The wp-json response referenced user endpoints. Review whether public user enumeration should be constrained on this site.

Severity: MEDIUM | Confidence: MEDIUM

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: GET /readme.html responded with status 200 and exposed WordPress version clue 2.

Evidence:

GET /readme.html responded with status 200 and exposed WordPress version clue 2.

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: HEAD /wp-admin/install.php -> 200; HEAD /wp-admin/upgrade.php -> 200.

Evidence:

HEAD /wp-admin/install.php -> 200; HEAD /wp-admin/upgrade.php -> 200.

Severity: MEDIUM | Confidence: MEDIUM

What to change: This check has no fix text yet.

Other Findings (continued)

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: post-views-counter v1.7.15, wp-call-button v1.4.4, contact-form-7 v6.1.7, google-site-kit v1.188.0, gtranslate v5.0.1, wordpress-seo v28.2

Evidence:
post-views-counter v1.7.15, wp-call-button v1.4.4, contact-form-7 v6.1.7, google-site-kit v1.188.0, gtranslate v5.0.1, wordpress-seo v28.2

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: A read-only system.listMethods call returned 80 method name(s).

Evidence:
A read-only system.listMethods call returned 80 method name(s). Risky names present: system.multicall, pingback.ping, wp.getUsersBlogs. Those methods were not called.

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Public version clue 2.

Evidence:
Public version clue 2. Current WordPress.org release 7.1.3. Confirm the version in wp-admin before updating.

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Other Findings (continued)

Finding

What was found: No result sentence was stored for this check.

Why it matters: post-views-counter 1.7.15 -> 1.8.0; contact-form-7 6.1.7 -> 6.2.2; wordpress-seo 28.2 -> 28.7

Evidence:
post-views-counter 1.7.15 -> 1.8.0; contact-form-7 6.1.7 -> 6.2.2; wordpress-seo 28.2 -> 28.7

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Prevents clickjacking attacks

Evidence:
Prevents clickjacking attacks

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Prevents MIME-type sniffing

Evidence:
Prevents MIME-type sniffing

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Legacy XSS protection (modern browsers use CSP)

Evidence:

Other Findings (continued)

Legacy XSS protection (modern browsers use CSP)

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Controls how much referrer information is shared

Evidence:
Controls how much referrer information is shared

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Controls browser features and APIs

Evidence:
Controls browser features and APIs

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Restricts Adobe Flash and PDF policies

Evidence:
Restricts Adobe Flash and PDF policies

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Other Findings (continued)

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Object/embed content is not explicitly restricted.

Evidence:
Object/embed content is not explicitly restricted.

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Clickjacking protection may be incomplete without frame-ancestors.

Evidence:
Clickjacking protection may be incomplete without frame-ancestors.

Severity: MEDIUM | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: /admin (200, admin-surface, confidence:medium), /wp-admin (200, admin-surface, confidence:medium), /wp-login.php (200, reachable-artifact, confidence:medium), /readme.html (200, reachable-artifact, confidence:medium)

Evidence:
/admin (200, admin-surface, confidence:medium), /wp-admin (200, admin-surface, confidence:medium), /wp-login.php (200, reachable-artifact, confidence:medium), /readme.html (200, reachable-artifact, confidence:medium)

Severity: MEDIUM | Confidence: MEDIUM

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Other Findings (continued)

Finding

What was found: No result sentence was stored for this check.

Why it matters: /admin (200), /wp-admin (200)

Evidence:
/admin (200), /wp-admin (200)

Severity: MEDIUM | Confidence: MEDIUM

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Detected 11 core/theme/plugin component signal(s) from public asset paths.

Evidence:
Detected 11 core/theme/plugin component signal(s) from public asset paths.

Severity: LOW | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Observed wp-cron.php status 200.

Evidence:
Observed wp-cron.php status 200. This endpoint is often abused for nuisance traffic or workload amplification if left unconstrained.

Severity: LOW | Confidence: MEDIUM

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: WordPress signal count: 6.

Other Findings (continued)

Evidence:
WordPress signal count: 6. Confirm the target is a live WordPress frontend URL.

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Sampled 12 frontend route(s) plus public WordPress endpoints for deeper evidence.

Evidence:
Sampled 12 frontend route(s) plus public WordPress endpoints for deeper evidence.

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Homepage component signals: 10; comprehensive component signals: 11.

Evidence:
Homepage component signals: 10; comprehensive component signals: 11.

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: Protocol: TLSv1.3; Cipher: TLS_AES_256_GCM_SHA384 (TLSv1.3)

Evidence:
Protocol: TLSv1.3; Cipher: TLS_AES_256_GCM_SHA384 (TLSv1.3)

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

Other Findings (continued)

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: upgrade-insecure-requests

Evidence:
upgrade-insecure-requests

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: upgrade-insecure-requests

Evidence:
upgrade-insecure-requests

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: No cookies were set on this response.

Evidence:
No cookies were set on this response.

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Other Findings (continued)

Finding

What was found: No result sentence was stored for this check.

Why it matters: No Access-Control-Allow-Origin header was returned on OPTIONS preflight or GET with a foreign Origin.

Evidence:

No Access-Control-Allow-Origin header was returned on OPTIONS preflight or GET with a foreign Origin. This may be expected for same-origin-only apps.

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: This check is a this area gap on this site. Leaving it in place keeps the weakness the scanner recorded.

Evidence:

1 hop(s)

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Why it matters: No `http://` src/href values detected in the fetched HTML.

Evidence:

No `http://` src/href values detected in the fetched HTML.

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.

Finding

What was found: No result sentence was stored for this check.

Other Findings (continued)

Why it matters: /.git/config (403), /.git/HEAD (403), /.env (403), /phpinfo.php (403), /.env.local (403), /error_log (403), /config.php.bak (403), /storage/logs/laravel.log (403), /wp-config.php.bak (403), /wp-content/debug.log (403)

Evidence:

/.git/config (403), /.git/HEAD (403), /.env (403), /phpinfo.php (403), /.env.local (403), /error_log (403), /config.php.bak (403), /storage/logs/laravel.log (403), /wp-config.php.bak (403), /wp-content/debug.log (403)

Severity: INFO | Confidence: HIGH

What to change: This check has no fix text yet.

How to recheck: Request the same URL again and confirm this result has changed.

Caveat: This result is not confirmed. Treat it as a lead until someone checks the live response.
